

LABORIS's services are about *inspections, tests, consulting* and *measures* on protective coatings. *Inspection and measures* are performed by highly qualified personnel and at work completed, if request by customer, is issued a certificate countersigned by a Coating Inspectors belonging to the ISPAC and graduate by

Carlo Banfo

school of the National Institute of Anticorrosion or a FROSIO Level III Coating Inspector.

For the performance of the services, **LABORIS** also has a collaboration with several Institutions, for example:

- **CNR** – National Research Council
- **DICHeP** – University of Genoa
- **Gruppo IspAC** – Paints Inspectors

Currently, benefit from our services companies producing raw materials for paints, manufacturing industry of flow control sector, national and international producers of paints, engineering and design companies, great shipbuilding companies, great energy production companies etc.
